

WHEEL AND TYRE DOLLY

Chariot à pneu
 Reifenwagen
 Carrello Portagomme
 Carros para neumáticos

The Wheel and Tyre Dolly is the perfect companion for storing or transporting wheels and tyres around the paddock, pit lane, garage or workshop.

Manufactured from Phenolic Plywood, the Wheel and Tyre Dolly has a non-slip rubberised surface which, when coupled with the lightweight 2-piece mild steel centre pole, keeps your wheels and tyres securely in position.

The Wheel and Tyre Dolly is available 2 diameters; 550mm or 660mm.

The Dolly features four swivelling castor wheels making it easy to manoeuvre, and it can be safely parked with the two braked castor wheels when not in use.

Wheel Protector Foam Discs are an optional extra which are designed to protect the rim faces when stacked vertically on a Wheel and Tyre Dolly.

The thick foam pads are available in either 500mm or 600mm diameters, and the Wheel Protector Foam Discs have a central hole for keeping them in position when used with the central pole on the Wheel and Tyre Dolly.

Sold in a set of 4 discs.
