

## 236/1136 JIC fittings

The 236 fittings are reusable fittings designed for use with the 200 & 210 series hose ranges. The triple seal/double O-ring nitrile, cutter design ensures a secure leak free connection, easily assembled using basic hand tools.

The 1136 fittings use a single nipple design, available in straight, 45° & 90° options; AN-04 only.

**The 1136 and 236 fitting alignments can be adjusted in situ.**
